ROCKBUD

hand drawing, reference images

Rockbud is a plant from Roshar, the planet where Brandon Sanderson's Stormlight Archive books are set. The planet is frequently beset by hurricane-like storms, and the flora and fauna have adapted to these conditions. Rockbud is described as rootless plant with a thick, fibrous stalk that contracts to close up leaves like panels.

CONCERT HALL

hand drawing

This concert hall was designed to have a long reverberation time, like a cave or cathedral. The drawings on the left are a first draft, those in the center are a revised design, and the right-most drawing is a sketched plan.
